## AREA OF EXPERTISE

Van Hauser brings a unique perspective and proven success in project delivery methodology from the healthcare industry. His depth of experience in strategic planning and facilities operations, capital planning, and property assessments broaden the value added services available to LCK's clients. Van's strength in relationship management, leadership, and team building enables LCK to offer the best in class project management solutions and service delivery. LCK leverages Van's mechanical engineering background and energy management expertise to enhance the technical aspects of LCK's project management initiatives.

Prior to LCK, Van served over 25 years as a leader in healthcare facilities management and construction with Sisters of Charity Providence Hospitals, Novant Health, Inc., and Forsyth Medical Center. Responsibilities ranged from providing administrative support to ancillary departments, to leading the planning, design, and construction of multiple green-field hospitals.

## ACHIEVEMENTS

- Recipient of Engineer of the Year Award by the North Carolina Healthcare Engineer's Association
- Past President, North Carolina Healthcare Engineer's Association

## SIGNIFICANT PROJECTS

- Providence Hospitals MRI Replacement/Renovation
- Providence Hospitals CT Scan Replacement/Renovation
